Work Experience

Web Developer   Oct 2023 - Present

● Built a real estate website with Multilingual capabilities.

OneOrigin | Senior Drupal Developer   Oct 2020 - Oct 2023

● Led the migration of 2 Enterprise Drupal applications and development of 1 Drupal application from estimation, initial concept to deployment.

● Collaborated with UX/UI designers to create responsive, user-friendly themes using HTML5, CSS3, and JavaScript libraries (e.g., jQuery).

● Customized and extended Drupal modules to meet project requirements, ensuring seamless integration with third-party APIs and services.

● Migrated multiple enterprise Drupal web applications from Drupal 7 to Drupal 9/10, which ranged from ~2000 pages to ~170000 pages.
● Rebuilt the frontend of the migrated sites from scratch using php template to twig templates.
● Built automation scripts to handle data transfer from different databases with different schemas.

● Provided technical support and training to content editors and site administrators.

● Worked closely with project managers to define project scopes, estimate timelines, and deliver projects on schedule and within budget.
● Complied with SEO and Accessibility standards for the web applications.

● Implemented and maintained a continuous integration/continuous deployment (CI/CD) pipeline for efficient development workflows.

● Conducted code reviews, identified and resolved security vulnerabilities, and optimized website performance through caching and other techniques.
● Worked on Debugging and Solving in large enterprise applications through Agile methodology.

● Excellent communication abilities. Handled multiple clients simultaneously and can respond to client concerns in a calm, concise, and timely manner.
